1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 PRODUCT IDENTIFIER

1.2 RELEVANT IDENTIFIED USES OF THE SUBSTANCE OR MIXTURE AND USES ADVISED AGAINST

1.3 DETAILS OF THE SUPPLIER OF THE SAFETY DATA SHEET

2P14/PU - Copper alloy in drops

Alloy for goldsmith

1.4 EMERGENCY TELEPHONE NUMBER

2. HAZARDS IDENTIFICATION

2.1 SUBSTANCE CLASSIFICATION FURTHER HAZARDS

None to report.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Cu, Ag, Zn - NOT DANGEROUS

4. FIRST AID MEASURES

It's good practice melting under extraction hoods or in
closed casting machines, in case of fumes inhalation ventilate the room. In case of illness seek medical advice.
No danger reported from normal use. Seek medical advice in presence of known sensitivity.
In case of contact with molten metal, evaluate the extent of the burn and seek medical attention.
In event of irritation from fumes oxide, rinse with water. Consult your doctor if you develop conjunctivitis.
No risks reported.
Vapor / fumes / dust: coughing, sneezing or
lacrimation. In case of repeated or prolonged
exposure, possible gastrointestinal disturbances,
breathing difficulty, hypotension, cramps, and fever. Symptoms can occur with a certain delay.

SCHEDA DI SICUREZZA	2P14/PU	07 07 16	Rev 0	Pag. 1 di 4
REDATTA IN CONFORMITA' AL REGOLAMENTO CE N.1907/2006	21 14/1 0	07.07.10	1.007.0	Tug. Tur

4.3 INDICATION OF THE POSSIBLE NEED OF IMMEDIATE MEDICAL ADVICE OR SPECIAL TREATMENTS Follow the procedures of safety agreed in your company

5. EXTINGUISHING METHODS

5.1 Extinguishing media Recommended extinguisher Forbidden extinguisher

None in particular Do not use water on molten metals

- 5.2 Special dangers due to the substance or to the mix None in particular. Molten alloy might release smokes and vapor made up of oxides.
- 5.3 Recommendations to the employees in charge of fire extinction Use adequate protections in case of smokes.Follow the procedures of extinguishing agreed in your company.

6. MEASURES IN CASE OF ACCIDENTAL RELEASE

- 6.1 Personal precautions, protection devices and procedures in case of emergency Inert material. Use individual protection devices in case of certain sensibility to the mix. Use protection devices in case of exposition to vapors and smokes. During working time, follow the safety procedures agreed in your company.
- 6.2 Environmental precautions Avoid release in the environment
- 6.3 Methods and materials for containment and collection Collect material using devices suitable to re-use the material itself and/or its recovery by the producer.
- 6.4 reference to other sections See sections 8 e 13

7. HANDLING AND STORAGE

- 7.1 Precautions for a safe handling Alloys can be handled without any particular precaution. During casting, melting, mechanical works, annealing and welding, provide for ventilation. Do not breathe dust, vapors and smokes.
- 7.2 Conditions for a safe storage, including possible incompatibilities. Alloys can be stored without any particular precaution. For a better use, it is suitable a covered and dry place for storage.
- 7.3 Final specific uses Copper alloy to be molten with pure gold.

8. EXPOSITION CONTROL/PERSONAL PROTECTION

- 8.1 Control parameters Limit values for zinc oxide TLV-TWA - smokes: 5 mg/m³, dusts: 10 mg/m³
- 8.2 Controls of exposition Respiratory protection
 Hands protection
 Hands protection
 Eyes protection
 Skin protection
 Use protective glasses while casting.
 Use protective glasses while casting.
 Use protective glasses while casting.

SCHEDA DI SICUREZZA	2P14/PU	07.07.16	Rev 0	Pag. 2 di 4

9. PHYSICAL AND CHEMICAL PROPERTIES

- 9.1 Information about the basic physical and chemical properties
 Aspect: alloy in drops
 pH: n.a.
 Casting point: ~ 1000 °C
 Relative density: ~ 9 g/cm³
 Odor: odorless
 Boiling point: not detected
 Solubility: Insoluble in water
- 9.2 Altre informazioni

None

10. STABILITY AND REACTIVITY

- 10.1 Reactivity High reactivity in presence of acids, oxidizing agents and caustic products
- 10.2 Chemical stability Stable product
- 10.3 Possible dangerous reactions Possible development of hydrogen and nitrogen tetroxide in presence of strong oxidizing mineral acids
- 10.4 Conditions to avoid Avoid contact between alloy drops and strong oxidizing mineral acids. Avoid melting temperature higher than the range indicated in the related tech chart.
- 10.5 Incompatible materials Oxidizing agents, acids and caustic products
- 10.6 Dangerous products due to decomposition None

11. TOXICOLOGICAL INFORMATION

- 11.1 information about toxicological effects Acute toxicity n.a. Irritation n.a. Corrosivity n.a. Sensitization In case of inhalation and/or contact with skin in concentration $\geq 1\%$ Toxicity with repeated dose n.a. Cancer-causing n.a. Mutagenicity n.a. Toxic for reproduction n.a. **12. ECOLOGICAL INFORMATION** 12.1 Toxicity n.a.
- 12.2 Persistence and debradabilityn.a.12.3 Bioaccumulative potentialn.a.12.4 Mobility on soiln.a.12.5 Results on PBT and VPVB valuen.a.12.6 Other negative effectsn.a.

13. DISPOSAL CONSIDERATION

13.1 Methods of waste treatmentReuse if possible.Follow the procedures and laws of your Country.

14. INFORMATION ON TRANSPORT	
14.1 UN number	n.a.
14.2 UN shipping rule	n.a.
14.3 Class of danger referred to transport	n.a.
14.4 Packing group	n.a.
14.5 Danger for environment	n.a.
14.6 Special precautions for users	n.a.
14.7 Collect transport according to Marpol 73/78 and IBC code	n.a.

15. INFORMATION ON REGULATIONS

- 15.1 Rules and laws on health, security and environment, specific for the mix This chart follows the directions of CE Rule 1907/2006
- 15.2 Chemical safety value no

16. OTHER INFORMATION

This chart has been written as per our knowledge at the present date. The user is asked to check if information are suitable and complete referred to the use of the alloy. Information on this chart are a description of characteristics of this product about its safety; this chart is not a guarantee of properties of this product.

This chart substitutes every previous communication.
